Abstract

Manubot Rootstock Information

Note: Manubot instances should delete this file.

The Manubot is a system for automating scholarly publishing. Content is written in Pandoc Markdown source files. See USAGE.md for more information on how to use the Manubot.

The Manubot project began with the Deep Review, where it was used to compose a highly-collaborative review article [1]. Other manuscripts that were created with Manubot include:

- The Sci-Hub Coverage Study (GitHub, HTML manuscript) [2]
- Michael Zietz's Report for the Vagelos Scholars Program (GitHub, HTML manuscript) [3]

If you notice a problem with Manubot, it's best to submit an upstream fix to the appropriate repository: <code>greenelab/manubot-rootstock</code> for the git repository stub or <code>greenelab/manubot</code> for the Python package.
